Portfolio: https://mukhtarcody-cmd.github.io/mukhtar-portfolio/

PROFESSIONAL SUMMARY

Senior Software QA Engineer with approximately eight years of experience delivering quality assurance across fintech, digital banking, ERP, digital transformation, and large-scale transactional platforms. Experienced in test planning, requirements analysis, functional and integration testing, UAT, defect management, release validation, and cross-functional delivery. Strong background in validating business-critical workflows, banking integrations, Arabic interfaces, data integrity, and regulatory requirements from analysis through production release.

SKILLS & TOOLS

TEST ENGINEERING	Manual Testing • Functional Testing • Regression • System Testing • Smoke & Release Testing
API & DATA	REST API Validation • Banking Integrations • Database Testing • Data Integrity • Transaction Flows
DELIVERY	Agile / Scrum • UAT Coordination • Defect Lifecycle • Risk-Based Testing • Requirements Analysis
PLATFORMS	Web Applications • Mobile Payments • ERP Systems • Arabic / RTL • Regulated Platforms
DOMAINS	Fintech • Digital Banking • Remittance • PCI DSS Controls • ERP & Digital Transformation
AUTOMATION	Playwright (Learning) • Git / GitHub • Test Automation • Reusable Test Design

PROFESSIONAL EXPERIENCE

Senior QA Engineer | Mendarna Engineering, Fujairah, UAE

March 2025 – Present

- Lead day-to-day QA delivery across sprint cycles, coordinating development and testing activities through Scrum ceremonies, structured follow-ups, and release-quality checkpoints.
- Analyze requirements and acceptance criteria, translate them into test scenarios, and ensure appropriate functional and UAT coverage for new features and fixes.
- Collaborate with cross-functional teams to improve early defect detection during UAT and reduce quality risks before production release.
- Communicate complex and business-critical defects clearly to technical and non-technical stakeholders, including impact, reproduction steps, severity, and recommended priorities.
- Create targeted test cases and regression coverage for critical defects, then coordinate retesting and closure verification.
- Review and approve Arabic screens and interfaces, validating right-to-left presentation, terminology, consistency, usability, and compliance with approved requirements.

Senior QA Engineer | Capital Plus, Khartoum, Sudan

July 2021 – March 2025

- Led quality assurance for an international remittance solution from gap analysis and localization through integration testing, UAT, launch, and post-deployment validation.
- Converted business, operational, and regulatory requirements into test strategies, acceptance criteria, end-to-end scenarios, and release-readiness assessments.
- Directed development and QA teams through daily Scrum meetings and sprint follow-ups, tracking dependencies, defects, risks, and delivery commitments.
- Validated remittance workflows across customer onboarding, transaction processing, fees, approvals, status handling, exception paths, and reporting.
- Coordinated and tested integrations with local and correspondent banks, reviewing API documentation and validating request-response behavior and transaction outcomes.
- Supported evidence preparation and system-quality validation required for licensing and certification processes with the Central Bank of Sudan.

PROFESSIONAL EXPERIENCE — CONTINUED

Software QA Engineer | Ministry of Industry and Trade, Khartoum, Sudan

June 2020 – November 2021

- Analyzed system requirements and business rules to define test scenarios, acceptance criteria, test data, and expected results for a large-scale distribution management platform.
- Developed and executed functional, integration, regression, system, and user-acceptance test cases.
- Tested end-to-end workflows covering data entry, allocation calculations, approvals, user permissions, distribution records, and report generation.
- Performed database and data-integrity testing to verify the accuracy, completeness, and consistency of operational records.
- Identified, reproduced, documented, prioritized, and tracked defects through closure, collaborating with developers, product stakeholders, and end users to validate solutions.
- Conducted risk-based testing of business-critical functions and edge cases, followed by smoke and post-deployment testing to confirm release stability.

Software QA Engineer – ERP Systems | Amipharma Laboratories Ltd., Khartoum, Sudan

April 2018 – April 2019

- Performed functional, regression, integration, and user-acceptance testing for ERP modules, configurations, workflows, and fixes.
- Analyzed and reproduced issues reported by ERP users, documented defects, and collaborated with technical teams to support resolution and verification.
- Validated business workflows, user permissions, master data, transactional records, and system-generated reports for accuracy and consistency.
- Conducted retesting and regression testing after configuration changes and fixes, maintaining test evidence, issue records, and troubleshooting documentation.

QA / Systems Engineer | Electronic Banking Services Company, Khartoum, Sudan

October 2017 – February 2018

- Tested the implementation of PCI DSS-aligned PAN masking controls for SMS notifications within Sudan's national payment switch.
- Performed functional, integration, security-control, and user-acceptance testing for 14 licensed mobile-payment applications and platforms.
- Validated transaction flows, system responses, exception handling, and connectivity between mobile-payment channels and the national switch.
- Supported the deployment and production verification of three banks connecting to the national switch, documenting defects and coordinating fix validation with technical stakeholders.

EDUCATION

Bachelor of Science in Management Information Systems | Al-Neelain University, Sudan | 2015

Higher Diploma in Business Administration

PROFESSIONAL CERTIFICATIONS

ISTQB® Certified Tester Foundation Level (CTFL) | ISTQB

Certification in Digital Money (CIDM) | Digital Frontiers Institute / Tufts University

Anti-Money Laundering (AML) Certification | Digital Frontiers Institute (DFI)
